06 60 22 37 72

Hello, I've been a web developer for about 4 years.

I'm really passionate about all of the new web technologies and I love to use them to create cool visual experiences.

I also really enjoy making tools to ease other developers life.

In my spare time, I practice Capoeira, Salsa and play video-games.

Experiences

2013 - today

I'm currently working at **Ageval Solutions** as a web developer.

My main task is to maintain and improve a web application sold to customer. I'm in charge of the front-end in association with graphists.

Keeping a wide range of browsers compatibility and ensure good ergonomoy are our main goals.

2012 - 2013

For a year, I worked as web developer at **@doc Solutions**.

I created several web sites using Joomla from mock-ups. I also built a reservation tickets system hooked at a payment module.

2013

I prepared and gave a training course about Prestashop and general use of Internet and its technologies at **IMIE Nantes**.

2012

I participated in the migration of the database of a project management tool at **Steria**.
